1 With that, I think we can reach an agreement not only on
2 which severs' partitions, but the timing of that. We
3 have started producing those -- some of the ones that
4 Mr. Howard has already mentioned on the record and, in
5 fact, in the order what's outlined in his March 16th
6 request.

7 There is another -- I guess the bigger issue,
8 and I don't know if Mr. Howard included this in the 12
9 servers, is when they originally went through the
10 original data warehouse review, they marked files either
11 produce or record, and we provided the court in this
12 discovery statement the stats on that. They now come
13 back and said we want the ones we marked record as well.
14 You know, that's another six million files and three
15 terabytes of data.
16 So at some point the volume gets to be useless,
17 I think, no matter how many world's of time they're
18 going to have to use this in whatever form this case
19 ultimately takes.

20 THE COURT: Well, I mean, and that's where I
21 would be inclined -- I mean, if then there is a desire
22 for more than the 12, I would very much be inclined to
23 cost shift, and I don't know if you're saying to
24 those -- are you objecting to producing the record ones
25 then?
